

Mount Pleasant Natural Resource Centre Inc

VOLUNTEER POSITION AVAILABLE

Bats for Biodiversity Project Officer

minimum 1 year at 2 – 4 days / month

Bats for Biodiversity is a community monitoring project that increases knowledge and awareness of our native bat species. This project needs a dedicated person to reinvigorate it. You will work with the MPNRC Coordinator to determine project direction and re-establish the Bats for Biodiversity support and knowledge sharing network. Possible project work includes sourcing funding, updating the Bats for Biodiversity Community Monitoring Manual, and organising training workshops. Knowledge of bats not essential – this is a great position to ‘learn on the job’. Good communication and organisation skills required.
