

Mount Pleasant Natural Resource Centre Inc

VOLUNTEER POSITION AVAILABLE

Garden Carer (multiple positions available)

1- 5 hours / month (can be after hours or on the weekend)

Volunteers are needed to help care for and improve our native plant water wise demonstration garden. Jobs include general maintenance e.g. weeding, pruning and replanting. Plans are underway to expand the current garden and replace a lawn area with water wise natives next year (underground rainwater tank going in so need to replace where we are digging). We also have some funds to plant a small revegetation plot on the block around the remnant gum trees. Every bit helps so even if you can only contribute a few hours each year it is still greatly appreciated! This is a great job for you and a friend or family member to team up for a couple of hours to help promote native plants for garden use within the community.
